Academic Year 2025-26

A Project Report on

MH-26 Services System

Submitted to

**DR. BABASAHEB AMBEDKAR TECHNOLOGICAL
UNIVERSITY, LONERE**

in partial fulfillment of the requirement for the degree of

BACHELOR OF TECHNOLOGY

in

COMPUTER SCIENCE & ENGINEERING

By

Darshdeep Singh Dutta

Shivam Jatale

MAHATMA GANDHI MISSION'S COLLEGE OF ENGINEERING
NANDED (M.S.)**

Academic Year 2025-26

Certificate

This is to certify that the project entitled

“MH-26 Services System”

*being submitted by **Mr. Darshdeep Singh Dutta** and **Mr Shivam Jatale** to the Dr. Babasaheb Ambedkar Technological University, Lonere, for the award of the degree of Bachelor of Technology in Computer Science and Engineering, is a record of bonafide work carried out by them under my supervision and guidance. The matter contained in this report has not been submitted to any other university or institute for the award of any degree.*

Project Guide

Dr. A. M. Rajurkar

H.O.D

Computer Science & Engineering

Dr. G. S. Lathkar

Director

MGM's College of Engineering,

Nanded

ACKNOWLEDGEMENT

We are greatly indebted to our seminar guide **Ms. Shelke M.G** for her able guidance throughout this work. It has been an altogether different experience to work with her and we would like to thank her for her help, suggestions and numerous discussions.

We gladly take this opportunity to thank **Dr.Rajurkar A.M.** (Head of Computer Science & Engineering, MGM's College of Engineering, Nanded).

We are heartily thankful to **Dr. Lathkar G. S.** (Director, MGM's College of Engineering, Nanded) for providing facility during progress of seminar, also for her kindly help, guidance and inspiration.

Last but not least we are also thankful to all those who help directly or indirectly to develop this seminar and complete it successfully.

With Deep Reverence,

Darshdeep Singh Dutta
Shivam Jatale

ABSTRACT

MH26 Services is a web-based local service discovery and booking platform developed to streamline access to essential household and professional services such as plumbing, electrical work, home cleaning, salon services, appliance repair, and carpentry within the MH26 region. The system replaces unorganized offline search methods and unreliable word-of-mouth recommendations with a structured, verified, and user-friendly digital platform. It enables customers to browse categorized service providers, view ratings and portfolio details, and schedule appointments through a simplified booking workflow.

The platform is built using a database-centric architecture where PostgreSQL ensures secure storage and relational consistency of user records, service listings, provider profiles, and booking transactions. Backend logic manages authentication, provider approval, booking lifecycle, and review submissions, while the frontend offers a responsive interface for seamless interaction. The implementation focuses on verified provider onboarding, transparent pricing, and reduced dependency on intermediaries. Testing confirms functional reliability across modules such as login, bookings, and provider management. As a result, MH26 Services delivers an efficient, scalable, and accessible solution tailored to local service needs, with future potential for payment integration, automated scheduling, location-based suggestions, and mobile application deployment.

Acknowledgement	I
Abstract	II
Table of Contents	III
List of Figures	IV
List of Tables	IV
Chapter 1. Introduction	1
1.1 Need for the System	2
1.2 Purpose of the System	3
1.3 Benefits of the Proposed System	3
1.4 Impact of the Proposed System	4
Chapter 2. System Analysis and Design	5
2.1 Design Overview	5
2.2 Core Table Structure	6
Chapter 3. System Implementation	7
3.1 Module Description	7
3.2 System Architecture	8
3.3 Technology Stack Details	9
Chapter 4. Testing and Results	10
4.1 Testing Strategy	10
4.2 Unit Testing	10
4.3 Functional Testing	10
4.4 Login Functionality Testing	11
4.5 Results	12
Conclusion	13
